Vladislavs Mihailovs

FRONTEND DEVELOPER / ANGULAR & TYPESCRIPT

Riga, Latvia · Remote
vladislavs.dev · GitHub: vladislavv27 · LinkedIn: Vladislavs Mihailovs

PROFESSIONAL SUMMARY

Frontend Developer with 4+ years of software development experience, specializing in TypeScript, Angular and modern web application architecture. Experienced in building production applications, SaaS dashboards, complex state management, authentication and API integrations. Strong background in NgRx, RxJS, SSR and performance optimization, with additional experience in Vue/Nuxt and React. Previously contributed to frontend architecture from initial development to release and mentored junior developers.

TECHNICAL SKILLS

Frontend: Angular (versions 16-18, 21), Nuxt/Vue, TypeScript, JavaScript.
State & rendering: NgRx, RxJS, Signals, SSR.
Backend & data: Node.js, PostgreSQL, GraphQL.
Tools: Git, Sentry, Google Lighthouse, Payload CMS, Docker.

WORK EXPERIENCE

Frontend Developer

SIA Databank | Remote | Sep 2025 – Present
KukiMuki & ZenCasino
• Designed NgRx/RxJS orchestration for payments, registration, authentication and content, separating business logic from UI components.
• Built multi-step onboarding with Sumsub identity verification and payment integrations, using Reactive Forms, cross-field validation and NgRx-managed submission state.
• Centralized token refresh across API requests, rejected stale responses and handled refresh failures with a single session reset.
• Built the Payload CMS layer with TransferState to reuse SSR data after hydration; deferred PixiJS/Spine initialization.
• Delivered the account area, loyalty calendar, promotions and referrals; implemented real-time missions with Socket.IO retries and listener cleanup.
• Built a Nuxt loyalty site with localization, dynamic sitemaps and partner tracking links.
• Added Sentry monitoring and used Lighthouse and Clarity to diagnose slow loading; implemented metadata, canonical/hreflang links and sitemaps.
Stack: Angular 21, TypeScript, NgRx, RxJS, Signals, Reactive Forms, Socket.IO, SSR, Payload CMS, Nuxt, Sentry.

Full-stack Developer

Avus Security | Freelance project | Remote | May 2026 – Present
Crypto compliance platform in development.
• Developed Nuxt case-review dashboards and Fastify APIs with shared Zod validation schemas and a generated OpenAPI client.
• Designed Temporal workflows for case summaries with timeouts, retries and PostgreSQL-backed status and failure tracking.
• Implemented a streaming AI assistant with conversation history, page context and per-user settings.
Stack: Nuxt/Vue, TypeScript, Node.js / Fastify, PostgreSQL, Temporal.

Vladislavs Mihailovs / Experience

Frontend Developer

Softrocket | Riga, Latvia | Mar 2024 – Sep 2025

Welle Casino

• Developed Welle's Angular/NgRx frontend from architecture to release with the frontend lead, collaborating with design and product.
• Mentored two junior developers through code reviews and pairing.
• Shipped multi-step onboarding with saved progress and validation, plus multi-currency payments and payouts.
• Added lazy-loaded routes and cached transaction history by date range, reusing data across tabs and refreshing on filter changes.
• Fixed Socket.IO reconnection during token refresh and replaced nested cashback subscriptions with RxJS streams.

Wazbee Casino

• Fixed inconsistent balance and currency displays by aligning account views with shared NgRx state.
• Preserved game-category filters across navigation and fixed a loading overlay that blocked cashier actions.

RoySpins

• Maintained Angular account and cashier interfaces; updated localized routes, campaign pages and GraphQL/CMS content.

Pledoo

• Maintained the existing Angular frontend and resolved UI bugs in account, payment and game-discovery flows.

Stack: Angular, TypeScript, NgRx, RxJS, Socket.IO, GraphQL, KeystoneJS.

Full-stack Developer Intern

BBIT | Jelgava, Latvia | May 2023 – Mar 2024

• Built Angular 16/Bootstrap interfaces for HM.Guru, eTop and CMS products: property management, authentication, shopping carts and dashboards.
• Developed and debugged ASP.NET Core REST APIs with Entity Framework Core and SQL Server.
Stack: Angular, Bootstrap, C#, ASP.NET Core, Entity Framework Core, SQL Server.

Frontend Developer Intern — React

LBTU | Jelgava, Latvia | Sep 2022 – May 2023

• Developed internal university applications using React.
Stack: React.

Education

Professional Bachelor's Degree in Information Technologies for Sustainable Development
Latvia University of Life Sciences and Technologies (LBTU) | Sep 2020 – Jul 2024
